## **James Morley Joins WellEz to Lead WellEz On-Demand™, the Integrated Support Program**

**Houston, Texas – 04 June 2009** – WellEz Information Management announced today that James Morley has joined the Company to manage WellEz On-Demand, the WellEz integrated support program. WellEz On-Demand integrates multiple support mechanisms for clients using WellEz.NET™, the web-based operations reporting service for the energy industry. Mr. Morley comes to WellEz with a breadth of experience in information technology sales, customer support and project management. He was formerly with Dell in Austin, Texas where his work included managing support for large customers in energy and other industries. Mr. Morley holds a B.A. degree from the University of Texas at Austin and is a graduate of the University's Project Management Certification Program.

"James brings to WellEz an excellent background in information technology, including the Software-as-a-Service (SaaS) business model, the platform through which WellEz delivers field operations reporting services to our clients. We are pleased to have him join the WellEz team and lead this important aspect of our business," says Charles Jeffery, President and CEO. WellEz On-Demand has been designed to offer continuous enhancement of the client experience, while identifying additional sources of value available to clients through WellEz services.

### **About WellEz Information Management, LLC**

WellEz ([www.WellEz.com](http://www.WellEz.com)) is a Houston based, privately held international service company providing the web-based WellEz.NET field operations reporting and support system worldwide. The Company is staffed by experienced oil & gas professionals and a team of highly qualified software development engineers. WellEz was founded in 2000 based on a business model of providing Software-as-a-Service, and to address the limitations and cost involved with the conventional approach of buying and installing software. The WellEz operations reporting service avoids these issues by offering a web-based solution that can be rapidly configured to each customer's specific reporting needs.
